

## AFONE BOLSTERS SECURITY BUSINESS

AFONE signed on 23 June the definitive acquisition agreement on ACDM Concept, an affiliate of EDF Développement Environnement, for which a letter of intent was issued on 21 April.

Based in Nancy, ACDM Concept generates €1.7 million in sales. The company uses a PC with cutting-edge technology for the management of complex sites. The high-tech image of AFONE's security arm will benefit handsomely from its sophisticated client follow-up capability. ACDM Concept is APSAD P3 certified - the highest certification level in the profession.

This acquisition rounds out AFONE's activities in this field, including the new subsidiaries Blokos Aquitaine Protection (Bordeaux) and Groupe Girardot (Chaumont). The acquisition will be accretive for the group.

This division will be headed up by Eric GRESSER, who joined the group in January 2006 to develop this business. He has 20 years of experience in this field, notably at A.D.T (Groupe TYCO).
