

- 2007: Business remaining on the same level quarter after quarter
- 3rd quarter 2007 sales figure: €14.6 million
- Sales figure for 9 months: €45.5 million

In the 3rd quarter of 2007, AFONE generated a sales figure of €14,619,000, in line with the previous quarters but that cannot be compared with fiscal 2006 as a result of the deconsolidation of the TPV activity since 31 December (representing €20 million for the full year).

The distribution of the sales figure by activity:

as a %	HY1	Q3
Telecom	38.0	40.2
Establishment of stocks	62.0	59.8

The change of the sales figure's distribution between 30 June and 30 September is linked to two main factors:

- the seasonal characteristic of the Card&Services activity, which is weaker during the summer and that should improve in the 4th quarter,
- the positive evolution of the historical activity as a telecom operator, which has notably improved both as a percentage but also in absolute value terms.

Key events after the period

- 15 October 2007 communiqué regarding the Mobiboom.com site: after having lost its appeal, Afone plans to apply to the Court of Cassation,
- 22 October announcement after an article published on 19 October: the E. Leclerc centres and Afone will be working together to develop a mobile telephony offer.

Upcoming appointments:

2007 annual sales figure, on 22 January 2008
